May 2018

Dear Parish Clerk

Street Lighting Improvement Works - remaining LED conversions

As you will be aware, the County Council has been undertaking a major project to upgrade streetlighting, with the main aim being to meet its carbon reduction target of 60% by 2020. Skanska UK PLC has been engaged to carry out these works.

Work to upgrade the lighting within your area has been taking place during the last 24 months in residential areas. We are now returning to your area to complete these conversions along with traffic route lighting. This remaining work will include wall brackets & wood pole-mounted units as well as some heritage lanterns.

Work may necessitate the need to temporarily reduce the pavement width and to use barriers to ensure we can work safely. Where wall mounted units are to be converted on private properties, we will inform the individual owners of the necessary works, prior to starting.

During this period, on-street parking may be affected. Residents and pedestrians are asked to be patient and we will do our best to minimise any inconvenience to you.

A copy of the agreed programme of works for this final year of conversion is attached. I would be grateful if you would share this information with the residents in your parish.

Yours faithfully

WORK IN STOW ON THE WOLD IS SCHEDULED TO BE COMPLETED BY THE END OF JULY 2018
